Carrera
Decorate Your Track

1. Recycle miniature trees from old Christmas decorations to add some scaled down winter shrubbery to your Racetrack. Add a little white paint to the top of the trees to make it look like there's snow!
2. Cut out the Santa Grid Girls and place them near the starting line! Fold the flap as necessary and use glue to stick the flap together. If you are using lighter paper, use a paperclip to anchor and support the flap and keep your Carrera Grid Girls upright!
3. Cut out the Christmas Mechanic Crew and place them near your fuel stop! Fold the flap as necessary and use glue to stick the flap together. If you are using lighter paper, use paperclips to anchor and support the flap and keep your Carrera Mechanics upright!
4. Using colouring pencils or crayons to colour the Christmas balls. Cut them out carefully and glue them to an old cardboard box. Then thread some string through the hole to take something from the racetrack to your Christmas tree!
